PROFESSIONAL SUMMARY

- Cloud/DevOps engineer designing, deploying, and operating cloud-native infrastructure on AWS.
- Hands-on with Terraform, Docker, Kubernetes (EKS), and CI/CD (GitHub Actions, Jenkins).
- Known for clean infrastructure-as-code, secure defaults, and repeatable deployments.
- Career transition from operations to Cloud/DevOps; documented projects and labs on GitHub.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, RDS, VPC, IAM, CloudWatch, ALB, Auto Scaling, Route 53)
- **IaC:** Terraform, AWS CloudFormation
- **Containers & Orchestration:** Docker, Kubernetes (EKS), Amazon ECS, ECR
- **CI/CD & Automation:** GitHub Actions, Jenkins, Bash, Python scripting
- **Networking & Security:** VPC design, subnets, security groups, load balancers, IAM least privilege
- **OS & Tools:** Linux (Ubuntu, Amazon Linux), Git/GitHub, monitoring & logging

SELECTED PROJECTS

Two-Tier AWS Web App (Terraform, ALB → EC2 ASG → RDS)

- Provisioned VPC, subnets, route tables, security groups, and IAM with reusable Terraform modules.
- Deployed highly available web tier behind ALB with Auto Scaling and parameterized variables.
- Improved repeatability and auditability via IaC and remote state; included destroy safety checks.

Static Portfolio Website (HTML/CSS on S3 + Route 53 + Formsfree)

- Built responsive single-page site with contact form, hosted via S3 static hosting and custom DNS.
- Added Formsfree endpoint with inline success/fail messages; published via GitHub Pages as well.

Containerized App Deployment (Docker → ECR/ECS; EKS exploration)

- Containerized Node.js sample app; built/pushed images to ECR via GitHub Actions.
- Deployed on ECS with task definitions and service; experimented with EKS workloads and manifests.

Repo: github.com/Tallboycadi/my-starter-scaffold

Infrastructure Automation

- Created Terraform modules for VPCs, subnets, NAT/IGW, and IAM roles with sensible defaults.
- Wrote make-like scripts to lint, validate, plan, and apply across environments.

EDUCATION & CERTIFICATIONS

- Cloud Engineering Certificate — Completed 2025
- A.A.S., Computer Networking — Robert Morris College, Chicago, IL
- Terraform & Kubernetes — hands-on labs (projects in GitHub)
